EPIC'S MELODY

EXAMPLE OF WIRING DIAGRAM FOR EPIC SKY TECHNOLOGY'S TWILIGHT STAR PANEL SYSTEM
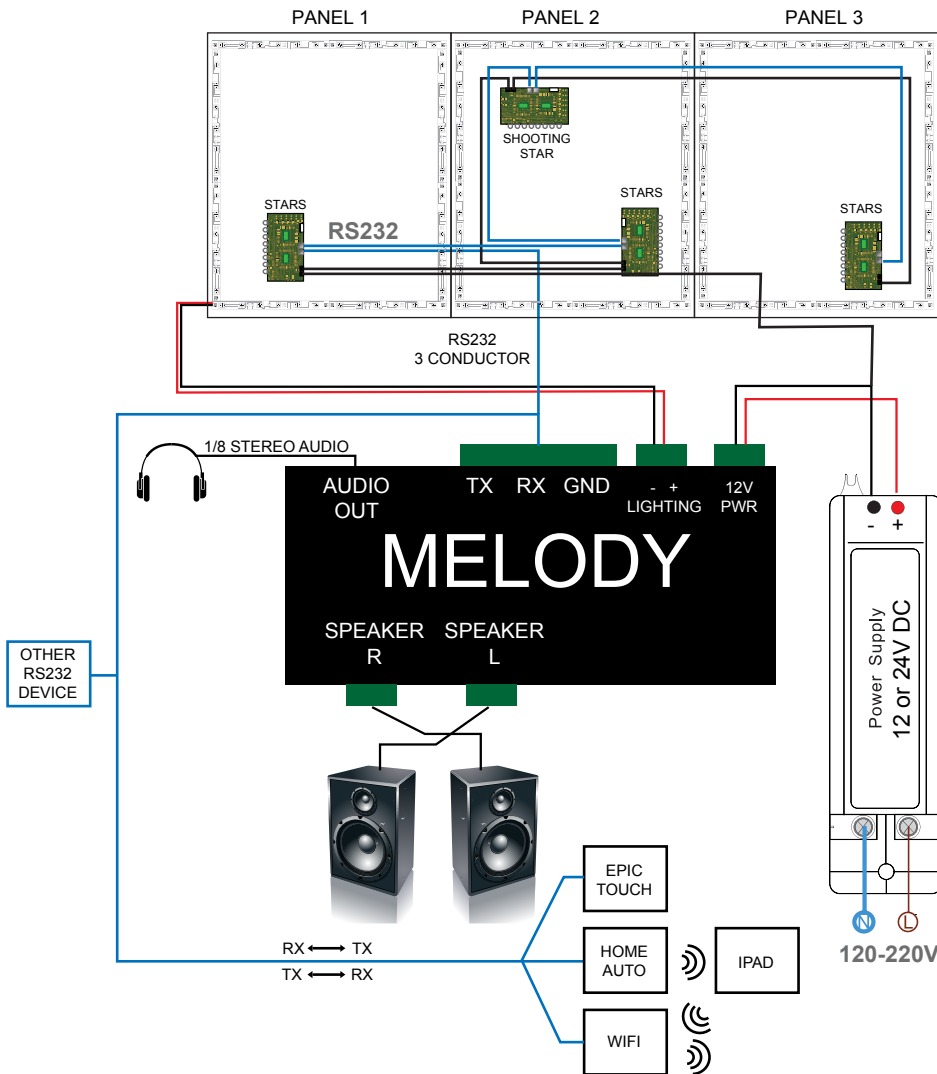

KEY FEATURES

The EPIC MELODY is a state of the art module that can trigger sound effects that synchronizes with the pre-programmed thunder, lightning and rain effects, etc.

The EPIC MELODY can either perform in standalone mode, or with a RS232 protocol which can be controlled by a third party control system or by the Epic Touch to produce sound effects on demand.

SPECIFICATION

• RS-232 controlled playback of pre-programmedmusic tracks
• A 'Lightning Channel" for thunderstorm effects
• 1/8 " Stereo Connector line level output (industry standard connection)
• Speaker level output for driving small speakers
• Serial feedback
• Fully controllable with any automation system

RS232 MELODY COMMANDS
