# EPIC *Symphony*

## *Add to your epic theatrical experience.*

We are lucky enough to live in a time where we have a choice when it comes to the way we consume entertainment. You can always go old school and buy a ticket to see a film in the theater on opening night, but as advanced home-theater technology becomes increasingly available and affordable, it's become an alternative for many cinephiles to stay home and wait until their favorite films come out in high definition.

There's nothing quite like experiencing a movie when your color changing lights are in sync with the genre film you are watching. Whether it's a sci-fi adventure unspool on screen, or laughing along with the latest comedy -- whether they're screaming at a horror film or sobbing with a drama -- there's never a moment when a viewer can feel quite as connected to a film than when surrounded by synchronized Color changing lights in their home theater.

The EPIC SYMPHONY is an music interface that analyzes a variety of frequencies and controls LED channels accordingly. The symphony is completely controllable via RS232.

### FEATURES:

- No programming is required
- Standalone unit or controlled via rs232 serial commands
- 2 kind of music inputs, line level in and detachable microphone
- Close contact control for on and off operation
- Can be used with most industry RGB LED controllers (constant current or constant voltage LEDs)
- 4 Channel controller RGBW
- Pre-addressed for different movie genre - horror, action, comedy and or concert shows, etc.
- Pre-addresses for a variety of music - classical, rock , pop, theatrical etc.
- Musical light show in your commercial or residential establishment
- Our solutions make it possible to increase the sustainability of soothing environments.
- Easily transform a space, and creates your own ambience mood with a customized and simplified music interface. Medical purposes (Stress and anxiety often are high for patients visiting a medical center and this can inhibit patient recovery time. If patients can customize their environment, it gives them additional control of their personal space. This, in turn, can have a positive effect on recovery time and quality.)
